BIOTECH

SOLLICE BIOTECH

SOLLICE BIOTECH is a life sciences key partner, as leading creator, producer and high-quality provider of active ingredients to benefit the cosmetics market.

SOLLICE BIOTECH offers a full range of innovative high-performance and functional active ingredients, which are scientifically proven to provide personal care and innovative solutions.

SOLLICE BIOTECH develops added value and sustainable partnerships with its clients and partners. This is done by combining expertise and skill to create molecules and produce ingredients to formulate high-quality products. Our aim is to stimulate product innovation and provide a high-quality service.

We modify and customize ingredients, on an international scale.

SOLLICE BIOTECH achieves the perfect balance between marketing and a scientific approach.

Located in France, a trend setter for the Cosmetic and Beauty industry, SOLLICE BIOTECH is committed to ongoing improvement and always puts its clients first.

INNOVATION

Key for improving our client growth and client profitability.

TEAMWORK

To be successful, we must work together and transcend organizational and geographical boundaries to meet the changing needs of our clients.

QUALITY

Quality is ingrained in the work and values of our company. Our business practices and processes are designed to achieve high-quality results that exceed expectations of clients, partners and investors.

CORE VALUES

"CREATION IS IN SOLLICE BIOTECH'S DNA,
A DAILY NEED IN ORDER TO ENHANCE
THE BEAUTY OF THE FUTURE."

CREATION

R&D CREATIVE MOLECULES

SOLLICE BIOTECH creates innovative active and functional ingredients and molecules from synthesis in our R&D laboratory in Toulouse, France.

SOLLICE BIOTECH takes advantage of the high-technology platform and strong expertise held by SYNTIVIA for the benefit of our clients.

Some technologies available are Microfluidic qPCR assay for Genomic screening, Surface characterization, Arrayscan® technology for protein evaluation, Video microscope, Biphoton/Confocal, and SPIM for Imaging.

- Conception of new patentable actives
- Innovative evaluation of biological actives

"WE INCREASE OUR R&D RESULTS
BY THE SELECTION OF SUITABLE PRODUCTION
TECHNOLOGY.

HIGH QUALITY STANDARDS, ENVIRONMENT
AND SAFETY REGULATIONS
ARE AT THE FOREFRONT OF OUR DEVELOPMENT."

PRODUCTION

PRODUCTION

NEW TECHNOLOGIES

We are always looking out for new technologies with personal care applications.

We use the best process of production available such as synthesis, fermentation, peptide, encapsulation and extraction, in order to fulfill the potential of all active biotechnologies or functional ingredients.

" WE SERVE CLIENTS
WITH TAILOR-MADE SOLUTIONS ".

MARKET BENEFIT

MARKET BENEFIT

SUPPLY

SOLLICE BIOTECH supplies active and functional ingredients developed and manufactured in different places across the world.

Thanks to our strong scientific skills and high-quality standards, we are able to anticipate the market needs and client requests by proposing innovative products.

Last but not least, we pay particular attention to only sell products that conform to European regulation.

REGULATION

We offer technical and regulatory support to clients and partners.

MARKETING & SALES

We monitor trends and the expectations of each market, to identify future demand and solutions.

We adapt our marketing approach and tools to suit each market (selective, medium or mass markets), taking care of each segment's brands and subcontractors.

Our sales team is experienced with strong technical backgrounds and is specialized in personal care and life science.

LABORATORY

In our own laboratories, our talented teams, specialized in creative formulation, can demonstrate and prove the products's capabilities.
