## UGIEL

ugiel.fr

RAW MATERIALS

**UGIEL: the start-up from Bordeaux, which converts gold into colors ...**  
UGIEL will take part at the Cosmetic 360 show to exhibit its first collection of precious colours, wich are designed for the production of high end manufactured objects.  
Being easy to process, and allowing to highlight almost every other material they can be associated with, these precious resins will diversify the palette of cosmetic, marketing, and design professionals, and give raise to many direct applications, for instance in fields like primary and secondary packaging, or bottle manufacturing.

## BIOALTERNATIVES

bioalternatives.com

TESTING & ANALYSIS

**Development and validation of a sebocyte in vitro model**  
Transcriptional, proteomic and functional characterization of the model.  
Model responding to androgens and to seborrhoeic factors.  
Model producing a lipid composition close to that of sebum (squalene, etc.).  
Model dedicated to the evaluation of active ingredients:  
dry skin, oily skin and acneic skin.

K8

## CELLOMET

cellomet.com

TESTING & ANALYSIS

**CELLOMET** offers research and development services on skin metabolism, aging and stress.  
CELLOMET has developed expertise in active compounds discovery and profiling and can thus identify new first-in-class protective skin cosmetic compounds acting on natural adaptive and protective mechanisms.  
CELLOMET offers combined measurements of bioenergetic and proteomics to reveal molecular signatures of metabolic health.

## ID BIO

idbio.eu

RAW MATERIALS

**Think Exposome: botanical solutions to address this new concept**  
Differentiating and innovative market approach suggested to the brands.  
Natural solutions to face the Exposome effects.  
Three botanical shields that act in synergy against the effects of UV, pollution, tobacco, temperature variations or cutaneous stress.

K6

## IDEA TEST

groupeideatests.com

**IDEA TESTS group** has specialized in efficacy evaluation (in vivo and in vitro), tolerance and toxicology of finished products and ingredients for the cosmetic industry.  
IDEA TESTS activities are organized into five categories: clinical testing, in vitro testing, microbiology, suncare testing and regulatory advice.

K16

## IMASENS

imasens.fr

TESTING & ANALYSIS

**IMASENS, a marketing and sensory research company** created in 2006, supports companies from the earliest stage of the product's innovation and development until the launch stage. IMASENS works in collaboration with more than 400 clients in France and abroad and carries out more than 700 consumer studies every year, almost a third of them are cosmetic's product tests. With over 10 years of experience in the cosmetic area, IMASENS has developed both qualitative and quantitative methodologies specifically designed for cosmetic studies.

## Laboratoire COSDERMA

cosderma.com

**Advanced technologies for efficient cosmetic testing**  
Improvement of data quality and traceability  
Accelerate and simplifies the data input and processing  
Management of data confidentiality by intervenor  
No paper, no double data entry  
Data Security : 21 CFR Part 11.

K16

## Laboratoire PHENOBIO

phenobio.fr

**AQUAROME®: a unique range of water-based active fragrances**  
AQUAROM® is based on essential oils solubilised in pure water  
The proprietary process creates an alternative to hydrosols  
By reducing allergens without affecting the odour, we can help you achieve legislative compliance  
Applications: personal care, perfumes and aromatherapy formulations.

K16

## LYSPACKAGING

lyspackaging.com

PACKAGING

**VEGANBOTTLE bouteille vegetale biodegradable compostable**  
Lyspackaging creates and produces packaging of the future biodegradable compostable made from vegetable raw materials to replace glass and PET bottles.  
This solution is more respectful for the environment.  
We can also introduce different wastes in our packaging (shells, nuts...).
